** DXCC: D6: Comoros; start 2012-08-01 **

Hi all

Itï¿½s just 6 weeks before the expedition and I promised to keep you informed.
These are our last news: We will arrive to Comoros on August 8^th and we will
be qrv on 6 meters from the following day, August 9^th until the 20^th .
We will run a dedicated station with K3 + pr6 preamp, ACOM1000, and a 6m8gj antenna.
QRV cw, ssb, digi modes (jt65a, iscat and jt6m) and EME . We will run a breakable beacon
on cw or jt65a. We hope to have internet access and will be on on4kst chats.
QTH will be LH18PJ just at sea side. By now we have got the license for
HF and 6 meters and flight tickets are already booked.

Schedule is as follows:
8/8 arrive to qth
9/8 install 6m station
First windows:
9/8 MR at 21.10Z
9/8 MS at 09.00Z
Last windows:
19/8 MS at 16:40Z
20/8 MR at 05:05Z
20/8 pack 6m station and return home
MR will be looking to mountains in the island about 200 meters high at 2 Km, will see how it works.
MS will be looking to the sea, expecting good ground gain and low noise.
We donï¿½t have any particular frequency, usually I will TX first on 193.
We will have elevation when moon is higher than 20 degrees. We expect to run about three hours
before/after MS/MR, and use the rest of diurnal time for terrestrial modes. Of course, if F2/TEP
opens it will have priority, sorry, I think you will understand us.

Hope to work all you from D64K
